**Game Description "Aztecs Empire"**

## Aztecs Empire

### Description and Rules

Aztecs Empire is a game with five reels. A game result consists of 5x3 symbols, each reel showing a section of three symbols.

### Screenshots

The following image shows a screenshot of the game:

Figure 1: Screenshot of Aztecs Empire

### Features

5 reels

1 to 10 selectable paylines (paylines are calculated from the left or from the right. With 5 of the same symbol in one pay line, these are only calculated once.)

**Joker:** The joker is a replacement for other symbols except scatter

**Scatter Win:** With 3 or more scatter symbols, you have a scatter win. The scatter symbols don't have to be arranged in a pay line for this.

**Aztecs Princess:** With at least 3 scatter symbols, you get 10 free spins. With every odd free spin (1, 3, 5, 7 & 9) one reel remains still each time and the symbols change into jokers.

**Gambling:** Winnings can be achieved by multiple doubling of winnings after the game. After each game won, gambling starts. Winnings can be doubled in various rounds. There is also the security stage which acts as an extra part of the game: if the blue symbol appears, the actual amount of winnings cannot be lost in the rounds which follow.

## Paytable

The following table shows the winning factor for all winning combinations. The winning factor represents the multiple of the bet value that is returned to the player when the winning combination occurs.

Symbol	Win Factors		
	5x Symbol	4x Symbol	3x Symbol
10	80	20	5
Jack	80	20	5
Queen	80	20	5
King	150	40	10
Ace	150	40	10
Jones	700	100	20
Key	800	150	30
Mask	1000	300	50
Scatter	150	20	4
Pyramid	3000	500	80

## User Interface

The following picture shows an example screen of a game with all GUI elements. The GUI elements are either contained in the panel at the bottom of the screen or in the top right corner and they are the same in all games.

Figure 2: Example Screen of Aztecs Empire with GUI elements.

The following list describes the function of all GUI elements shown in figure 2:

1. The start button to start a game
2. The autostart button to start games automatically:  
If a game is finished the next game is started without user interaction
3. The payable button: The player can view a payable listing the winning amounts of all winning combinations by pressing this button.
4. The bet control: The value shows the current bet value.  
It can be changed with the “+” and “-“ buttons.
5. The win display: If the player wins, the amount won is shown in this field.
6. The credit display: Shows the current account balance of the player
7. The denomination display: Shows the denomination factor.
8. The game over display: The text “GAME OVER” is shown when the game is in idle mode and waiting for user interaction
9. The sound on/off button: The player can turn the sound on/off by pressing this button
10. The real time clock: Shows the current time.
11. The close button: The player can close the game by pressing this button.
12. The full screen toggle button: The player can turn the full screen mode on/off by pressing this button.
13. The „Level“ Button: The level of the Bet can be set by using the plus and minus buttons. („+“/ „-“)
14. The „Lines“ Button: The amount of paylines can be set by using the plus and minus buttons („+“/ „-“)

## Bet Values and Denomination

All games use a denomination of 1 point of credit equals 0.01 Euro (=1 Eurocent). The following possible bet values are allowed: 1, 2, 5, 10, 20, 50, 100, 200, 500, 1000, 2000, 4000, 6000 and 8000.

## Gambling

During this secondary game the player can bet the previously won amount with the possibility to double it but also with the risk to lose it. The player can play a theoretically indefinite number of gambling rounds after he or she has received a win in the main game. In each round he or she can double the current win.

## Symbols

The following symbols are possible outcomes of the game:

Heart (red)

Diamond (red)

Spade (black)

Club (black)

Star (blue)

## Screenshots

The following image shows a screenshot of gambling:

*Figure 4: Screenshot of Gambling*

The following list explains the GUI elements of the gambling shown in the screenshot in figure 4:

1. The collect button: When the player clicks this button, he quits gambling and collects the current amount shown in the field for the current win (number 5).
2. The red button: The player can click on this button to choose the red symbols (heart and diamond). A click on this button leads to the evaluation of the gambling round: The die stops spinning and shows a symbol. If it is a red symbol (heart or diamond) then the player wins.
3. The black button: The player can click on this button to choose the black symbols (spade and club). A click on this button leads to the evaluation of the gambling round: The die stops spinning and shows a symbol. If it is a black symbol (spade or club) then the player wins.
4. The die: This field shows the spinning die (while still waiting for user interaction) resp. the stopped die with the final game outcome.
5. The potential win: Shows what the win will be raised to if the player wins the next gambling round.
6. The saved win: Shows what the win will drop to if the player loses the next gambling round.
