### Merkmale

5 reels

1 to 20 selectable paylines (paylines are calculated only from the left)

**Joker:** The book symbol acts as a JOKER and free spin-Scatter-Symbol in the normal game and also during the free spins. This symbol is a replacement for all symbols and 2-, 3-, 4- or 5-of the same will result in a win.

**Bonus games:** Three or more scatter symbols in the game result will trigger 10 free spins with a special expanding symbol. At the beginning of the free spin, a normal symbol will be chosen to act as the expanding symbol, which will then stretch itself over all three positions of the reel.

## Paytable

The following table shows the winning factor for all winning combinations. The winning factor represents the multiple of the bet value that is returned to the player when the winning combination occurs. Only the highest win per payline will be taken into account.

Symbol	Faktor			
	2 Symbols	3 Symbols	4 Symbols	5 Symbols
10		5	25	100
