Game Description "Retro Wheels"

Retro Wheels

Description and Rules

Retro Wheels is a game with five reels. A game result consists of 5x4 symbols, each reel showing a section of four symbols.

Screenshots

The following image shows a screenshot of the game:

Features

5 reels
10 to 50 selectable paylines (paylines are calculated only from the left)
Joker: The wild symbol only appears on the middle reel and acts as a replacement for other symbols.
Scatter-Gewinn: With three or more scatter symbols you get a scatter win. The scatter symbols don't have to be ordered in one payline in order to win..

Paytable

The following table shows the winning factor for all winning combinations. The winning factor represents the multiple of the bet value that is returned to the player when the winning combination occurs. Only the highest win per payline will be taken into account.

Symbol	5 of a Kind	4 of a Kind	3 of a Kind
	2000	500	100
	500	200	75
	300	150	50
	300	150	50
	200	100	25
	200	100	25
	150	75	15
	150	75	15
	50	20	2
	The wild symbol appears only on the middle reel and acts as a replacement for other symbols.

User Interface

The following picture shows an example screen of a game with all GUI elements. The GUI elements are either contained in the panel at the bottom of the screen, on the top and the sides and they are the same in all games.

Abbildung 2: Screenshot of Retro Wheels and the GUI-Elements

The following list describes the function of all GUI elements shown in figure 2:

1. The start button to start a game
2. The "i" button: The player can view a paytable listing the winning amounts of all winning combinations by pressing this button. The Bonus games will also be explained.
3. The full screen toggle button: The player can turn the full screen mode on/off by pressing this button.
4. The credit display: Shows the current account balance of the player
5. The win display: If the player wins, the amount won is shown in this field.
6. The real time clock: Shows the current time.
7. By pressing the „Settings" button, the player can turn the sounds and music for the game on and off.
8. By pressing the „bet control" button, the player can increase or decrease the current bet and the number of paylines
9. The autostart button to start games automatically: If a game is finished the next game is started without user interaction
10. This value shows the amount of the current total bet.
11. This value shows the number of paylines (10 to 50 are possible)

Bet values and Denomination

All games use a denomination of 1 point of credit equals 0.01 Euro (=1 Eurocent). The following possible bet values are allowed: 10, 20, 30, 40, 50, 60, 80, 100, 150, 200, 250, 300, 400, 500, 600, 800, 1000, 1500, 2000, 2500, 3000, 4000, 5000
